

Canyon Lake Release Advisory  
October 31, 2018  
9:15 a.m.

The water level in Canyon Reservoir has decreased to near conservation pool level and is currently at 910.00 mean sea level (msl). Under the direction of the U.S. Army Corps of Engineers (USACE), GBRA will take over management of water releases at 11 a.m. today, Oct. 31, and lower the release rate to 800 cubic feet per second (cfs).

Property owners, recreationalists and other stakeholders should take notice of the changing river flows. Additional information about Canyon releases and other stream flow data may be found at <https://bit.ly/2NI2HTz>.
