

Canyon Reservoir Advisory
August 5, 2019

Canyon Reservoir is currently at 909.33 ft. Due to the declining lake elevation and lower inflow at Spring Branch, GBRA is decreasing the water release rate at Canyon Reservoir to 150 cfs Monday evening August 5, 2019.

Property owners, recreationalists and other stakeholders should take notice of the changing river flows. Additional information about Canyon releases and other stream flow data may be found at <https://bit.ly/2NI2HTz>.
